Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 26-30, and 35 allowed.

Prior fails to show a bracket attached to a stationary vacuum box and a rotor being configured as a shell of a vacuum belt conveyor pulley wherein, the bracket is configured to have one connection surface to hold a knife plates, rotary rippers and choppers.

Response to Arguments

2. Applicant's arguments with respect to claims 22 and 33 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ivanto (4771197) in view of Yoshino (JP354122805A).
Ivanto discloses a electric machine in fig.1 comprising: a stator (3), a non-rotary shaft (4) caring the stator, a plurality of bearing (5) connected to the rotary shaft, a rotor (2) rotatably position around the stator and carried by the bearing and a

micro-actuator having a functional part with the short circuit arrangement associated with the rotor for operating the actuator. Ivanto does not disclose hollow short circuiting conductors configured for the flow there through of a cooling fluid including at least over-pressed air.

Yoshino discloses a squirrel cage motor including 1-5 comprising: a rotor (15) having hollow short circuiting conductors (17), and a hollow shaft (8) configured to flow fluid for the purpose of raising cooling efficiency. Therefore, it would be obvious to one having ordinary skill in the art at the time then invention was made to modify the Squirrel cage of Ivanto motor with the hollow conductors of Yoshino to efficiently cool the motor.
